| In some cases, we process your data automatically with the aim of evaluating certain personal aspects (profiling). For instance, we use profiling in the following cases:  
— We are required by law to take anti-money laundering and anti-fraud measures. Data evaluations are also carried out in payment transactions, among other things, in this context. These measures also serve to protect you.  
— In order to provide you with targeted information and advice on products, we use evaluation tools. These enable demand-oriented communication and advertising, including market and opinion research.  
— We use scoring to assess your creditworthiness. We calculate the likelihood that a given client will meet their contractual payment obligations. The calculation may include, for example, income levels, expenses, existing liabilities, occupation, length of employment, experiences from the previous business relationship, repayment of prior loans in accordance with the contract, and information from credit agencies. Scoring is based on a mathematically and statistically recognized and proven procedure. The calculated score values assist us in our decision-making and are incorporated into ongoing risk management. | N.A. |
